

FINANCIAL PROTOTYPE BRANCHES

FINANCIAL • PROTOTYPE BRANCHES • These facilities were designed to become the institution's prototype design and to be site adapted to multiple locations. • Many of the prototype designs allow for a "kit-of-parts", where the lending platform, retail functions, teller functions and safe deposit vault can be interchangeable, thus allowing the main entry and drive-in functions to be placed in the most advantageous position on the site.

BANK ONE SUGARLAND FORMERLY TEAMBANK SUGARLAND, TX

- New 5,500 sf branch bank facility with a 5 lane attached motor bank. A palette of materials was utilized to be repeated in future prototype facilities.
- Materials included a two-tone brick veneer, standing metal roof and colored awnings at the windows.

WELLS FARGO BANK NORTH RICHLAND HILLS, TX

- A new 6,500 sf branch bank with a 10 lane attached motor bank. This facility was designed to be the new "prototype" branch design and would be site adapted to multiple locations throughout Texas.
- Architectural elements were designed and used to reflect Texas regionalism. Materials included heavy rusticated stone blocks, face brick and standing seam metal roofing.

WELLS FARGO BANK CONROE, TX

- New 5,500 sf branch bank facility with a 5 lane attached motor bank. A palette of materials was utilized to be repeated in future prototype facilities.
- Materials include a two-tone brick veneer and standing metal roofs.
